## WAY Global Momentum Fund

Class S Income Shares (ISIN GB00BG1QH633)

The Fund is managed by WAY Fund Managers Limited

### Objective and investment policy

#### Objective:

The objective of the Fund is to achieve long-term capital growth.

#### Policy:

- The Fund aims to achieve this by primarily investing in a diversified portfolio of globally focussed exchange traded funds, which invest principally in equities.
- The Fund may also invest in transferable securities, other collective investment schemes (regulated and unregulated), deposits, money market instruments, derivatives and cash or near cash.
- The Fund is managed using a systematic and low-cost approach to gain exposure to a range of developed global equity markets via investing in and regular rebalancing of exchange traded funds (or similar instruments). The strategy relies on remaining exposed to each market whilst certain trend-following signals are positive (whilst there is positive market momentum) but withdrawing to cash during periods when those signals turn negative. This is intended to reduce volatility within long-only equity investment, thereby securing a much improved risk-return outcome.
- The asset allocation between markets favours no particular country and does not reflect market capitalisations. The Fund will always be very well diversified across developed global equity markets, or in cash where the trend-following signals are negative.

- The Fund may invest in derivatives and forward transactions for investment purposes as well as for efficient portfolio management purposes (including hedging).

#### Other information:

- Investment in the Fund should be regarded as long-term, which is upwards of three to five years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- The initial charge is deducted from your investment at the outset and various other charges accrue daily, therefore an equivalent rise in the value of units is required before the original investment can be recovered.
- The ACD carries out investors' requests, to buy, sell or switch, at 12:00 hours (UK time) on each business day (which excludes public holidays). If the ACD receives a request after 12:00 hours (UK time), the ACD will deal with it on the next business day.
- As you hold income shares, income from investments in the Fund will be paid out to you twice a year.

### Risk and reward profile

◀ Lower Risk

Typically lower rewards

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is ranked as a "4" on the scale. This is because the Fund by its nature invests in a mixture of investments. The value of some of these investments may vary more widely than others. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

The indicator above does not take account of the following risks of investing in the Fund:

• The Fund invests indirectly in some overseas markets which carry a higher than average risk of investment and the Fund may have problems or delays in getting its investments back.

• Investments may be made in assets denominated in various currencies and the movements of exchange rates may have a spate effect, unfavourable as well as favourable, on the gains and losses otherwise experienced on such investments.

• There is a credit risk, where the counterparty to a deal may default on repayment or not deliver its side of the deal. The Fund aims to minimise concentrations of credit risk by undertaking transactions with a large number of counterparties on recognised and reputable exchanges. The Fund only buy and sell investments through brokers which have been approved as an acceptable counterparty.

• The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.

• Derivative instruments may be used in the Fund for the purposes of investment and efficient portfolio management (EPM). Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques). However, it is the ACD's intention that the Fund will not have volatility over and above the general market volatility of the markets of its underlying investments and that the use of derivatives and forward transactions in the pursuit of the objective will not cause the risk profile to change.

For full details of the Fund's risks please see the 'Risk Factors' section of the Fund's Prospectus, which is available from WAY Fund Managers Limited, Cedar House, 3 Cedar Park, Cobham Road, Wimborne, Dorset, BH21 7SB or, during normal business hours on 01202 855856.

The ongoing charges figure is based on expenses for the period ending 28 February 2018 and may vary from year to year. The ongoing charges figure includes any portfolio transaction costs which the Fund pays to its service providers (e.g. to the Fund's custodian) and any entry/exit charges the Fund pays when buying/selling units in another fund. In general, however, the figure excludes other portfolio transaction costs. The ongoing charges are taken from income. Should income levels be insufficient, investments in the Fund may be sold to cover the Fund's expenses, its capital assets may be used to meet ongoing charges and the value of your units would be reduced.
