Class I Accumulation Shares (USD) (ISIN GB00BQWS3C69)

The Fund is managed by WAY Fund Managers Limited

Investment Objective and Investment Policy

Objective:

The investment objective of the Fund is long term capital growth and to exceed the performance of the MSCI World Index Total Return in GBP.

Policy:

The Fund aims to achieve its objective through investment in a concentrated portfolio of listed equity securities invested on a global basis.

The Fund will invest a minimum of 70% in equity securities of mid- and large-cap companies, being those with a market capitalisation of at least GBP 1 billion. Although the Fund may invest in equity securities of companies established, operating and listed in any global market, it is anticipated that the Fund will invest a minimum of 50% in equity securities of companies established and listed in the EEA and the USA.

The Fund may also invest in other transferable securities including UK government and public securities, units or shares in collective investment schemes, money market instruments, cash and near cash, and deposits.

The Fund may, in addition to its other investment powers, use derivatives and forward transactions for efficient portfolio management, investment purposes and borrowing under the terms of the Regulations. Use of derivatives may change the risk profile of the Fund.

Benchmark:

The appropriate target benchmark against which the performance of the Fund can be measured is the MSCI World Index Total Return in GBP.

Other information:

- Investment in the Fund should be regarded as long-term, which is at least five years.
- There can be no guarantee that the objective of the Fund will be achieved.

- The Fund is ranked as a "6" on the scale. This is because the Fund invests in a combination of equity securities and collective investment schemes specialising in a mixture of ethical or sustainable industry sectors. The value of some of these investments may vary more widely than others.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The indicator is not a measure of the risk as you may lose the amount you have invested.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The indicator does not take account of the following risks of investing in the Fund:
 - The Fund relies on other parties to fulfil certain services, investments or transactions. If these parties become insolvent and fail to meet their obligations, it may expose the Fund to financial loss.
 - The investments of the Company are subject to normal market fluctuations and other risks inherent in investing in securities.

This Fund is authorised in the UK and regulated by the Financial Conduct Authority ("FCA"). The ACD/Manager is authorised and regulated in the UK by the FCA. This key investor information is accurate as of 16 April 2026.

- Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques). It is not intended that the use of derivatives for investment purposes will cause the net asset value of the Fund to have high volatility however investors should be aware that the use of derivatives may cause the risk profile of the Fund to change on occasion.
 - Certain securities could become hard to value, sell at a desired time and place, or cease to trade altogether.
 - The Fund will have a concentrated portfolio of assets with as few as 20 equity security holdings at any one time. Whilst increasing potential reward, the nature of a more concentrated portfolio can increase risk. As such, the returns may be more volatile.
