Investment Manager's Report

For the six months ended 30 September 2025 (unaudited)

Investment Objective

The investment objective of the Fund is to seek a high level of capital growth over a period of at least 5 years.

Investment Policy

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 40% and 85% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

Investment Review

The WAY Global Growth Portfolio Fund (E Accumulation share class) rose 10.29% over the six months to 30 September 2025 while the comparator benchmark, the Investment Association ("I.A.") Mixed Investment 40-85% Shares sector average rose 9.33%.

Global equities rose 15.37% in sterling terms over the six months under review, with large United States ("U.S.") technology companies leading returns on enthusiasm for the commercial prospects for Artificial Intelligence ("A.I."), while global bonds rose 0.81%. U.S. and United Kingdom ("U.K.") inflation remained elevated at 3.8% and 2.9% respectively at the period end but eurozone inflation fell to 2.2%. The Bank of England, Federal Reserve ("Fed") and European Central Bank continued to ease monetary policy, reducing their policy interest rates to 4%, 4-4.25% and 2% respectively.

The U.S. President, Donald Trump, threatened "reciprocal" tariffs on his "liberation day", causing equities to retreat but they rebounded subsequently, reaching new highs as trade deals were negotiated, including 10% on U.K. imports and 15% on most European Union imports. This in part caused the dollar to drop 6.18% against a basket of other major currencies. The U.S. economy rebounded from its first quarter contraction to 3.8% annualised in the second quarter of 2025 and company earnings proved strong but recent jobs data disappointed. In the U.K., however, data were subdued. Gold gained 17.43% in sterling terms as geopolitical and fiscal concerns increased and central banks increased their gold reserves.

President Trump's "One Big, Beautiful Bill Act" covering tax cuts and higher defence and border spending is expected to raise U.S. government debt by \$3 trillion. The U.S. lost its last triple A credit rating after a Moody's downgrade due to concerns about government debt. Trump's measure and his tariffs may be inflationary. To provide protection should inflation remain sticky, the portfolio retained an allocation to short-dated inflation-linked bonds.

Following April's tariff-triggered market sell-off during which the Nasdaq index entered bear market territory, the portfolio modestly topped up its equity allocation through an addition to Fidelity Index UK, which tracks the FTSE All Share Index constituents. These tend to be less sensitive to domestic trends than smaller companies, with around two-thirds of their earnings derived from overseas. The increase was funded by a reduction in the bond allocation. Fidelity Special Situations, which focuses on undervalued U.K. companies entering a period of positive change, was also increased.

Investment Manager's Report (continued)

For the six months ended 30 September 2025 (unaudited)

Investment Review (continued)

During the period, the portfolio's allocations to equities in Europe excluding the U.K. was increased at the expense of global equities. Dimensional Global Targeted Value, which has a bias towards smaller companies, was decreased because smaller companies may be challenged in an environment of sticky inflation while Fidelity Index Europe ex UK was added. Europe ex-UK equities may benefit from benign inflation, lower interest rates and fiscal stimulus, including Germany's proposed defence and infrastructure package.

The portfolio remained overweight in emerging market equities, which are attractively valued and may benefit from dollar weakness and higher economic growth prospects. The long-term prospects for India are positive but Stewart Investors Indian Subcontinent All Cap was trimmed following the fund manager's departure without a clear successor. The proceeds were reallocated to an existing emerging markets equity investment, pending the identification of a replacement. Mobius Investment Trust, which invests in small and medium-sized companies in emerging and frontier markets, was also sold.

Outlook

High valuations driven by optimistic earnings expectations warrant a cautious approach to large U.S. technology companies while lowly-valued equities in emerging markets appear attractive. In bond markets, short-dated inflation-linked bonds provide protection should inflation stay higher for longer. Amid political and geopolitical uncertainty, asset class and geographic diversification may prove beneficial.

The Operating Charge is the total expenses paid by the Fund in the period, annualised, against its average Net Asset Value. This will fluctuate as underlying costs change.

The Fund has invested in Collective Investment Schemes during the period and where any such schemes were held at the Fund's accounting reference date, the expenses incurred by these schemes are included in the above Operating Charges. From November 2023, the underlying costs relating to closed-ended funds have been excluded from the Fund's Synthetic expenses. Where closed-ended funds are held within the Fund's portfolio, this will have the effect of reducing the Operating Charges figures shown above.

On 27 August 2025, the Synthetic Risk and Reward Indicator ("SRRI") of each of WAY Global Growth Portfolio Fund's Share classes were decreased from 5 to 4.

- The indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund appears as a "4" on the scale. This is because the Fund by its nature has exposure to equity securities which can experience high rises and falls in values.

Notes to the Interim Financial Statements For the six months ended 30 September 2025 (unaudited)

Accounting Basis, Policies and Valuation of Investments

Basis of accounting

The Interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 "The Financial Reporting Standards Applicable in the UK and Republic of Ireland", the Statement of Recommended Practice ("SORP") for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014, Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the FCA's Collective Investment Schemes Sourcebook ("COLL"), the FCA's Investment Funds Sourcebook ("FUND") and the Fund's Instrument of Incorporation.

The accounting policies applied are consistent with those of the audited annual Financial Statements for the year ended 31 March 2025 and are described in those Financial Statements. In this regard, comparative figures from previous periods are prepared to the same standards as the current period, unless otherwise stated.

As described in the Certification of Financial Statements by Directors of the ACD on page 4, the ACD continues to adopt the going concern basis in the preparation of the Financial Statements of the Funds.

Basis of valuation of investments

Market value is defined by the SORP as fair value which is the bid value of each security.

Collective Investment Schemes are valued at quoted bid prices for dual priced funds and at quoted prices for single priced funds, on the last business day of the accounting period.

All investments are recognised and derecognised on trade date, and any trades that occur between valuation point and close of business are included in the Financial Statements.

Non-observable entity specific data is only used where relevant observable market data is not available. Typically this category will include single broker-priced instruments, suspended/unquoted securities, private equity, unlisted close-ended funds and open-ended funds with restrictions on redemption rights.

As at the balance sheet date the WAY Global Growth Portfolio Fund holds 331,333 shares in Better Capital. Our approach to the fair valuation of this asset is included below.

Better Capital PCC Ltd delisted in June 2020 and will be wound up. The asset is currently priced at zero under the instruction of the Fair Value Pricing Committee of the ACD.

The remuneration strategy across WAY Fund Managers Limited is governed by the WAY Fund Managers Limited Board and WAY Fund Managers Limited has chosen not to establish a Remuneration Committee. The WAY Fund Managers Limited Board has established a Remuneration Policy designed to ensure the AIFM Remuneration Code in the UK Financial Conduct Authority's handbook is met proportionately for all AIFM Remuneration Code Staff.

WAY Fund Managers Limited considers its activities as non complex due to the fact that regulation limits the AIF strategies conducted and the scope of investment in such a way that investor risk is mitigated. The discretion of WAY Fund Managers Limited and the portfolio manager is strictly controlled within certain pre-defined parameters as determined in the prospectus of each Alternative Investment Fund.

In its role as an AIFM, WAY Fund Managers Limited deems itself as lower risk due to the nature of the activities it conducts. WAY Fund Managers Limited does not pay any form of variable remuneration currently. Therefore WAY Fund Managers Limited has provided a basic overview of how staff whose actions have a material impact on the Fund are remunerated.

The only material change to the adopted remuneration policy, since the previous year end, is the identification of new risk takers and inclusion of delegates required by the AIFMD.

September 25	Number of Beneficiaries	Total remuneration paid (GBP)	Fixed remuneration (GBP)	Variable remuneration paid (GBP)	Carried interest paid by the AIF (GBP)
Total remuneration paid by WFM during the financial year	17	651,565	651,565	0	0
Remuneration paid to employees of WFM who have a material impact on the risk profile of the AIF	6	294,168	294,168	0	0

Due to the size and structure of WAY Fund Managers Limited, it is determined that employees of the AIFM who have a material impact on the risk profile of the AIF include the Board, Head of Finance and Head of Risk and Compliance.

The delegated investment manager is subject to regulatory requirements on remuneration that WAY Fund Managers Limited deem to be equally as effective as those detailed in the AIFMD, which would include the Capital Requirements Directive or Markets in Financial Instruments Directive.
