EF WM Global Corporate Autonomies Fund, a sub fund of EF WM UCITS Portfolio
Class I Accumulation Shares (ISIN GB00BV0LRZ32)

The Fund is managed by WAY Fund Managers Limited

Investment Objective and Investment Policy

Objective:

The Fund's principal objective is capital growth with income generation being of secondary importance.

Policy:

In aiming to achieve the Fund's objective, the Investment Adviser will invest directly into shares of large companies that dominate their respective niches.

The Investment Adviser will identify companies which, in its opinion, fall into this category and will invest the Fund's assets into 100 such companies.

Investment into the selected securities will, upon investment, be equally weighted. Each quarter the portfolio will be rebalanced, to restore the equal weighting.

The portfolio will be reviewed each quarter to identify any companies which are singularly experiencing negative returns in the short term or in fact their particularly industry is. Such securities will be removed from the portfolio and replaced by other eligible securities.

The Fund will be diversified both globally and by sector.

The Fund may also invest in other transferable securities, money market instruments, cash and near cash and deposits.

The use of derivatives is permitted for the purpose of efficient portfolio management (typically hedging, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is Pounds Sterling).

Benchmark:

The appropriate comparator benchmark against which the performance of the Fund can be measured is the MSCI World Equal Weighted Index.

Other information:

- The charges applicable to the Fund accrue daily, therefore an equivalent rise in the value of shares is required before the original investment can be recovered.
- There can be no guarantee that the objective of the Fund will be achieved and there is a risk that investors may not get back the original amount invested.
- Investment in the Fund should be regarded as long/term, which is at least 5 years.
- You can buy and sell your units in the Fund on each business day between 9am and 5pm.
- If you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.
- If you hold income shares, income that is available from the Fund will be paid out to you twice a year.

Risk and Reward Profile

- The Fund is ranked as a "5" on the scale. This is because the Fund by its nature invests in a mixture of investments. The value of some of these investments may vary more widely than others. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The indicator does not take account of the following risks of investing in the Fund:
 - The Fund invests in equity securities which carry potential for attractive returns over the longer term, however the volatility of these returns may also be relatively high.
 - Stock market prices, currencies and interest rates can move irrationally and can be affected unpredictably by diverse factors, including political and economic events.

- The Fund may invest in other currencies. As a result, changes in the rates of exchange between currencies may cause the value of the shares to go up or down.
- There is a risk that third parties that the Fund enters into investment contracts with fail to meet their obligations and the Fund may suffer a loss.
- The Fund may enter into certain derivatives transactions, including, without limitation, forward transactions, futures and options. This is for hedging or efficient portfolio management purposes only, in order to reduce or eliminate risk arising from fluctuations in interest or exchange rates and in the price of investments. The value of these investments may fluctuate significantly. By holding these types of investments there is a risk of capital depreciation in relation to certain Fund assets but there there is also the potential for capital appreciation of such assets. The ACD does not anticipate that the use of derivatives in this way will change or alter the overall risk profile of the Fund.
- For full details of the Fund's risks please see the 'Risk Factors' section of the Fund's Prospectus, which is available from the ACD at WAY Fund Managers Limited, Cedar House, 3 Cedar Park, Cobham Road, Wimborne, Dorset, BH21 7SB or, during normal business hours on 01202 855856, or via www.wayfunds.com.

The Ongoing charge shown above does not include an amount relating to the cost of investing in closed-ended vehicles, such as investment trusts (where a fund holds such assets), which are typically fund-style assets listed and dealt on an investment exchange (e.g. the London Stock Exchange). These costs are, however, shown separately on the 'Fund Charges and Costs' document to be found on our website at www.wayfunds.com, under 'Important Information'. The relevant column is 'Closed-ended funds – Synthetic costs'. If that figure is zero against a fund, it means that the fund is not investing in closed-ended funds.
